

Health eAchievement is a coordinated school health management solution that helps schools address wellness priorities through an evidence-based approach. Data-driven decision making is enhanced through Health eAchievement while administrative time is saved. Core features include:

- Secure data repository for school districts and regions
- Federal and state wellness policy mandates compliance
- Required health and fitness screenings in accordance with best practice
- Instructional material for students and staff to understand and manage their health
- Dynamic resources to help educators create, store and share lesson plans

“When you can have data readily available on a web-based program that people can go find out about, whether your child has a health problem or is in need of some kind of intervention or prevention program, then everybody can work together for a common cause.”

Amy Sichel, PhD, Superintendent at Abington School District, Abington PA
a user of Health eTools for Schools®, a custom application built by InnerLink
for Highmark Foundation, that informed the development of Health eAchievement.

Health eAchievement is easy to use with unique functionality and benefits for:

- Administrators
- School nurses
- Physical educators
- Parents
- Students
- Teachers

Health eAchievement benefits include:

- Fast, efficient, best practice approach to wellness policy creation and implementation
- Ability to capture student demographic information
- Interdisciplinary approach to improve student and staff wellness
- Simplified data collection, reporting and analysis
- Standards-aligned health enrichment curriculum
- Improved communication with parents about student health status
- Records state mandated health and wellness data

A comprehensive approach to creating a healthy learning environment where all students can achieve their potential
