Smart Solutions for a Healthy Community

Executive Leadership

Dr. Robert Gillio

Chairman, CEO and Chief Medical Officer

With a passion for helping our communities stay safe and healthy, Dr. Gillio left a thriving medical practice to found InnerLink in 2001. Leading the way, Dr. Gillio found himself at Ground Zero serving an instrumental role caring for our country's first responders. Throughout his two decade distinguished medical career, Dr. Gillio coupled his skills as a Board Certified pulmonologist with his quest to make the practice of medicine safer and better understood through technology. A problem solver and inventor, he is recognized for solutions in health IT, patient safety, education and emergency response. Dr. Gillio has focused this phase of his career on chronic disease prevention by creating solutions that help tomorrow's leaders learn, live and share a healthy lifestyle with their communities.

Dr. Michael Curley

Chief Operations Officer

Michael Curley, Ed. D. is a veteran chief administrator of a three-campus career and technology center. He was recently honored as a Distinguished School Leader, and is in residence at career and technology centers throughout Pennsylvania. Over the course of his career, Dr. Curley impacted the lives of thousands of children and helped garner more than \$100,000,000 for career and technology education and training. His attention is now focused on ensuring that students are prepared for the workforce with 21st century career skills.

Smart Solutions for a Healthy Community

InnerLink Solutions

StudentHealthForce™

A K-12 enrichment curriculum and in-school health education, afterschool or summer program that helps youth address critical health issues and workforce challenges in their community while becoming mentors for younger students. Student Health Force takes a coordinated approach to helping schools and communities:

- Advance health and technology literacy
- Improve academic performance
- Create capacity for employment programs
- Link students to local employers and workforce development agencies
- Gain supplemental support through federal Workforce Investment Act funds

Health eAchievement is an electronic school health management solution that helps schools address wellness priorities through an evidence-based approach. Data-driven decision making is enhanced through Health eAchievement while administrative time is saved. Health eAchievement takes a comprehensive approach to creating a healthy learning environment where all students can achieve their potential. Core features include:

- Secure data repository for each school district and region
- Compliance with federal and state wellness policy mandates
- Required health and fitness screenings in accordance with best practice
- Interdisciplinary approach to improve student and staff wellness

InnerLink

Smart Solutions for a Healthy Community

InnerLink Solutions

Health eBeginnings is a bilingual, blended learning solution that provides a basis for pregnant teens to become successful, nurturing parents. Health eBeginnings' online courses provide pregnancy education, planning resources and 21st century skills instruction reinforced with supplemental printed material. Health eBeginnings helps schools and communities:

- Improve parenting skills
- Improve health outcomes
- Reduce infant mortality and low birth weight
- Reinforce classroom curriculum

Health eAssistance provides the framework to implement a model student assistance program. This secure, web-based case management solution accelerates a school's ability to mobilize resources. Health eAssistance helps foster resiliency in children by increasing access to the quality resources needed to remove barriers to learning. Health eAssistance:

- Supports state reporting requirements
- Stores data in a secure repository for each school district
- Allows for case ownership
- Integrates seamlessly with Health eAchievement and Health eTools for Schools

Health eAcademy provides access to our network of partners and individuals, who are experts in their respective fields. Services available through Health eAcademy include:

- Professional development
- Workforce development
- Resource development
- Health promotion and disease prevention
