

# StudentHealthForce™

Student Health Force is a scalable program combined with K-12 enrichment curriculum that empowers students with 21st century job skills and health knowledge to educate their peers and advance health throughout their schools and across the community.

Student Health Force takes a coordinated approach to helping schools and communities:

- Advance health and technology literacy
- Improve academic performance
- Create capacity for employment programs
- Link students to local employers and workforce development agencies

“Ever since I became a part of the Student Health Force program I listen, learn it and go back home to share everything. It feels good to have learned something that would benefit me and my family’s health, our lives our future.”

Briana Hill, Student Health Force Chicago graduate

and start a force for health in your community.

## Changing Behaviors

A comprehensive resource for health promotion and disease prevention that:

- Enables and motivates students to be the change agent in their community
- Facilitates dissemination, data capture, reporting and analysis of community programs

## Preparing Tomorrow's Workforce

Address today's critical health issues and workforce challenges through a flexible in-school, after-school or summer program where students learn to:

- Better manage their health
- Expand their career options
- Provide community service

## Curriculum for All Educators

Standards-aligned, interdisciplinary K-12 health enrichment curriculum helps educators:

- Facilitate team and project-based learning
- Report and assess their class progress online
- Breakdown barriers with online accessibility

**Learn it! Live it! Share it!**
